

Finout | Lyft Executive Demo

Cloud Cost Visibility for Multi-Cloud Infrastructure

- AWS + GCP + Kubernetes + AI spend in one view
- Built for engineering + finance alignment
- Clear ownership across teams, products, and services
- Faster decisions with trusted cost data

Prepared by Julia Vavrinyuk
Sales Engineer, Finout

Why Finout?

- No single view across cloud + SaaS spend
- Ownership unclear across shared environments
- Manual reporting slows finance + engineering
- AI spend is growing without clear tracking
- Need faster decisions with trusted data

Visibility

Allocation

Optimization

Overview Dashboard

- Leadership snapshot of spend and trends
- Forecasting + anomalies
- Optimization recommendations

Current Cost by Cost Center

Time frame: Current Month Time Interval: Monthly

Name	Total cost ↓	Previous period total cost	Percentage of total cost
AWS	\$12,991,506	-\$471,669 ↗ 3.503%	54%
Azure	\$4,239,713	-\$131,224 ↗ 3.002%	18%
GCP	\$2,678,874	+\$100,691 ↗ 4%	11%
kubernetes	\$2,437,371	-\$20,221 ↗ 0.823%	10%
Datadog	\$1,176,072	-\$229 ↗ 0.020%	5%
Anthropic	\$189,515	+\$8,942 ↗ 5%	0.787%
Total	\$24,072,772	-\$663,117 ↗ 2.681%	100%

MegaBill | Unified Spend

- One place for AWS, GCP, Kubernetes, Anthropic
- Filter, compare, drill down instantly
- Usage + cost context together

Virtual Tags | Ownership at Scale

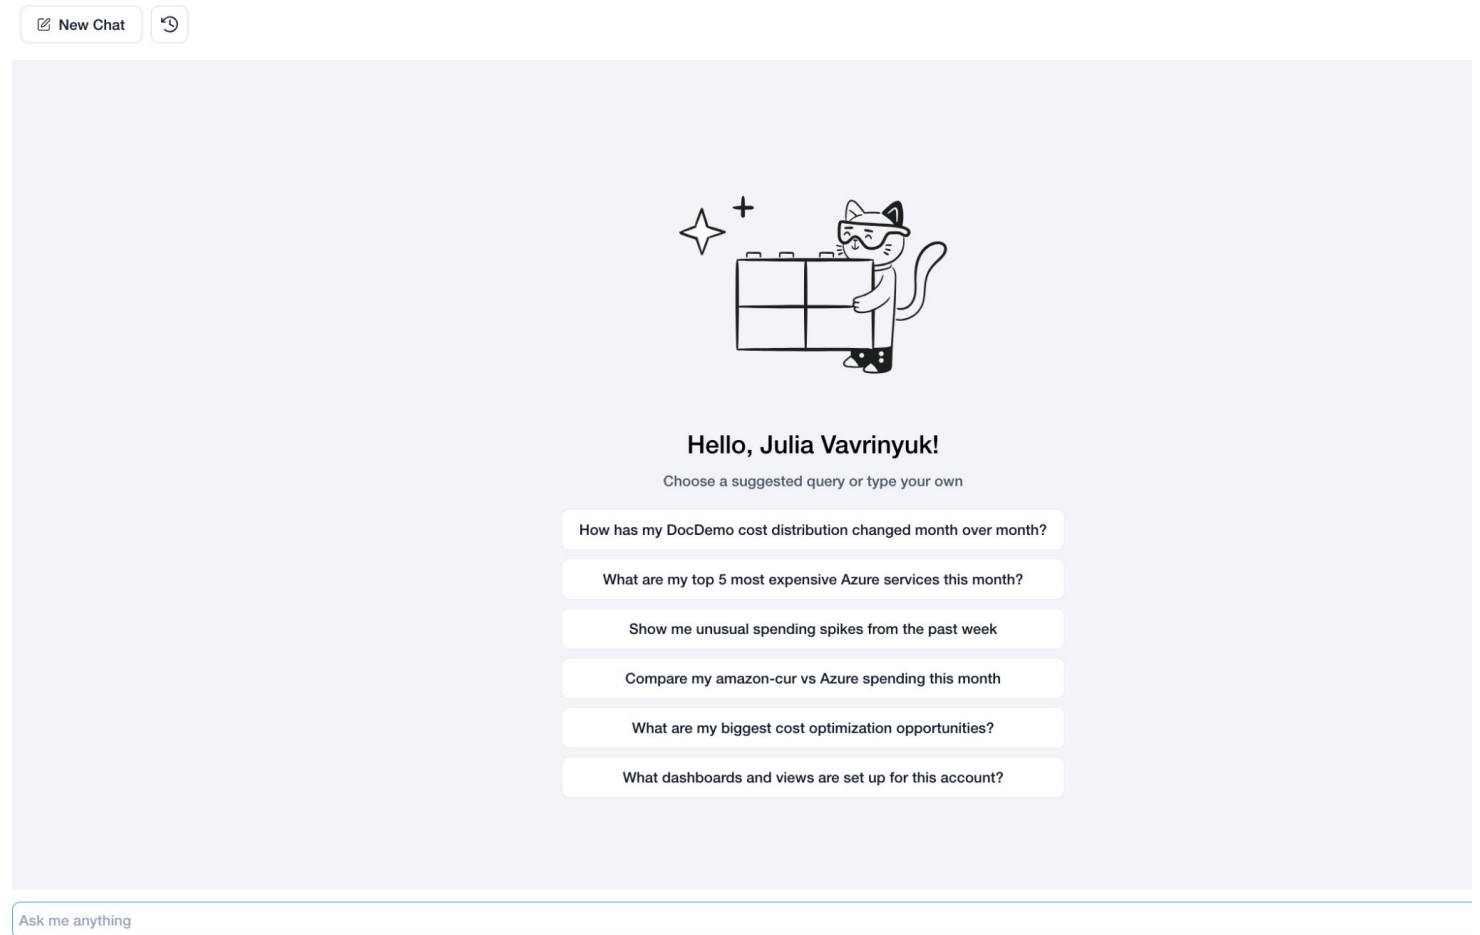

- Map spend to teams, services, launches
- No need to change native cloud tags
- Retroactive reporting on historical costs

Billy AI | Ask Questions, Get Answers

- Plain-English answers from cost data
- Reduces manual reporting time
- Accessible to finance + engineering, cross functional teams, business users

Success Criteria | 30-Day POC

- Unified cloud visibility
- Accurate Kubernetes allocation
- AI spend baseline
- Identify savings opportunities
